QUANTITATIVE STRESS SCENARIOS

CRITICAL EVENT TRIGGER	DEPENDENCY PATHWAY	FINANCIAL IMPACT
Broker Non-Vote Accumulation Exceeds Threshold	Dependent on retail participation rates, custodian proxy delivery cadence via Broadridge, and Georgeson outreach efficacy.	Proposal 1 fails to achieve the 16,998,535 affirmative votes required under DGCL § 251, leaving common equity exposed to pre-announcement trading baseline ($83.67).
Revlon Injunction Motion Based on 60-Minute Blind Auction	Dependent on judicial evaluation in Chemung/New York County of whether pre-signing market check of 20 NDAs provided adequate price discovery prior to final blind window.	Shareholder plaintiffs seek preliminary injunction delaying the special meeting vote pending expanded disclosure of Party B final interactions.

QUANTIFIED RISK EXPOSURE SCHEDULE

The following mechanisms operate as unhedged structural risks that shock derived valuation metrics or voting stability.

UNHEDGED DELTA 01: Absolute Statutory Vote Vulnerability (DGCL § 251)

Cost to Cure: Requires independent fee assessment / Variable by engagement scope | Walk-Away Threshold: Fewer than 16,998,5

Owned By: Legal | Leverage Level: 7/10

UNHEDGED DELTA 02: Deferred Cash Retention Disclosure Friction

Cost to Cure: Requires independent fee assessment / Variable by engagement scope | Walk-Away Threshold: Adverse recommend

Owned By: HR | Leverage Level: 5/10
