QUANTITATIVE STRESS SCENARIOS

CRITICAL EVENT TRIGGER	DEPENDENCY PATHWAY	FINANCIAL IMPACT
FTC/DOJ Issues Second Request on Vertical Foreclosure Grounds	Dependent on FTC bureau review cadence, market share overlap in infusion distribution, and buyer willingness to offer behavioral firewalls without exceeding contractual efforts standards.	Extends review timeline by 6 to 9 months; potential impasse if regulator requests structural distribution supply divestitures exceeding 'reasonable best efforts'.
Syndicate Debt Market Dislocation on $3.15B Funded Debt Package	Dependent on high-yield and leveraged loan credit spreads, debt commitment letter expiration dates, and borrower compliance with marketing period requirements.	Parent forced to draw alternative bridge facilities or face $291.93M Parent Termination Fee call; closing is expressly not conditioned on financing.
State Board of Pharmacy Licensing Delays Across Footprint	Dependent on multi-state change-of-ownership (CHOW) regulatory processing speeds in 43 individual state pharmacy boards prior to October 5, 2027.	Parent legally compelled under heightened 'best efforts' standard to litigate or satisfy state conditions across 86 pharmacies and 187 ambulatory suites.

QUANTIFIED RISK EXPOSURE SCHEDULE

The following mechanisms operate as unhedged structural risks that shock derived valuation metrics or voting stability.

UNHEDGED DELTA 01: McKesson Strategic Co-Investment Vertical Supply Chain Exposure

Cost to Cure: $5.0M - $12.0M in extended antitrust counsel, economic consulting, and expert testimony. | Walk-Away Threshold: Re

Owned By: Legal | Leverage Level: 7/10

UNHEDGED DELTA 02: Several Liability Enforcement Gap on Equity Guarantees

Cost to Cure: $1.5M - $3.5M in Delaware Court of Chancery specific performance litigation expenses. | Walk-Away Threshold: Uncu

Owned By: Credit | Leverage Level: 6/10
