TRANSACTION CONTEXT & STATUTORY SUMMARY

Baldwin Insurance Group faces pre-closing friction arising from its Up-C dual-class structure, insider rollover equity, and lack of a majority-of-the-minority voting condition. The transaction relies solely on a single-class vote of Class A and Class B shares. Insiders commit ~30% of total voting power (~15.0% beneficial ownership) and secure a ~7.3% rollover into Topco common equity alongside institutional sponsors (DFO and Sequence), while unaffiliated Class A stockholders are cashed out at $32.50 per share. Concurrently, TRA Amendment No. 1 directs up to $298,450,598 in accelerated cash termination payments exclusively to TRA unitholders, excluding public stockholders. Without a non-waivable majority-of-the-minority voting condition, the buyout fails the MFW dual-cleansing standard under Delaware law, exposing the transaction to entire fairness scrutiny and potential fiduciary breach litigation.

CHAPTER 16: AUDIT METHODOLOGY & INSTITUTIONAL DISCLAIMER

RAVEN FORENSIC AUDIT METHODOLOGY:

Raven Adversary operates an adversarial multi-agent debate process between a Seller's Advocate and an Adversarial Buyer. Claims are verified against primary statutory SEC EDGAR filings (Forms 8-K, 10-K, 10-Q, Schedules 13D/G) using strict non-inference guardrails. Where terms, cash balances, or lender waivers are missing from the public record, they are explicitly classified as NOT ESTABLISHED IN AVAILABLE RECORD. Synthetic data or fabricated valuations are strictly prohibited.

INSTITUTIONAL LEGAL DISCLAIMER:

This intelligence dossier is prepared for transaction diligence and board risk mapping purposes. It does not constitute formal legal counsel, an underwriting commitment, or a fairness opinion. All quantitative stress tests reflect contractual terms and public filings as of the analysis date. Transaction counsel and financial advisors must verify primary agreements and disclosure schedules prior to closing.
