TRANSACTION CONTEXT & STATUTORY SUMMARY

The proposed $5.8B take-private of Option Care Health, Inc. by Onyx Bidco LLC combines a $3.15B debt package with $2.873B in equity commitments, including a $1.4B minority co-investment by wholesale pharmaceutical distributor McKesson Corporation (~48.725% of equity) alongside Clayton, Dubilier & Rice Fund XII. The transaction contains no contractual financing condition and designates the Target an express third-party beneficiary entitled to seek specific performance of the equity commitments. However, the transaction architecture exhibits critical exposure at the intersection of syndicate structure and regulatory standards: equity commitments and the $291.93M Parent Termination Fee limited guarantees are several and not joint, leaving Option Care without recourse against the non-defaulting sponsor if either party fails to fund. Furthermore, while Parent is subject to a heightened 'best efforts' obligation for state healthcare and pharmacy licensing across Target's 86 pharmacies and 187 ambulatory infusion suites, antitrust clearance under the HSR Act is governed solely by a mutual 'reasonable best efforts' standard. Because Option Care sourced 68% of its supplies from four wholesale distributors in 2025 and 57% from three in H1

Because Option Care sourced 68% of its supplies from four wholesale distributors in 2025 and 57% from three in H1 2026, combining McKesson's distribution scale with Target's downstream network creates vertical foreclosure scrutiny that the Buyer Consortium is not contractually bound to resolve through burdensome divestitures under a reasonable best efforts threshold prior to the October 5, 2027 outside date.

CHAPTER 15: EPISTEMIC CONFIDENCE & DISPUTE CLASSIFICATION MATRIX

VERIFIED FACT	Primary SEC EDGAR definitive transaction documents, exhibits, and notes. Uncompromised statutory disclosures filed under the Securities Exchange Act of 1934.
INFERRED CONCLUSION	Financial propagation cascades, dilution expansions, and liquidity drain models derived mathematically from verified contractual covenants and debt ratchets.
UNRESOLVED VARIABLE	Parameters not established by the available public record (e.g. executed lender maturity extension waivers, unencumbered cash balances, target commercial backlogs).
SPECULATIVE SCENARIO	Potential post-closing scenarios, shareholder direct/derivative challenges under DGCL 262, or proxy advisory campaigns not yet filed.

CHAPTER 16: AUDIT METHODOLOGY & INSTITUTIONAL DISCLAIMER

RAVEN FORENSIC AUDIT METHODOLOGY:

Raven Adversary operates an adversarial multi-agent debate process between a Seller's Advocate and an Adversarial Buyer. Claims are verified against primary statutory SEC EDGAR filings (Forms 8-K, 10-K, 10-Q, Schedules 13D/G) using strict non-inference guardrails. Where terms, cash balances, or lender waivers are missing from the public record, they are explicitly classified as NOT ESTABLISHED IN AVAILABLE RECORD. Synthetic data or fabricated valuations are strictly prohibited.

INSTITUTIONAL LEGAL DISCLAIMER:

This intelligence dossier is prepared for transaction diligence and board risk mapping purposes. It does not constitute formal legal counsel, an underwriting commitment, or a fairness opinion. All quantitative stress tests reflect contractual terms and public filings as of the analysis date. Transaction counsel and financial advisors must verify primary agreements and disclosure schedules prior to closing.
