COMPOSITE TRANSACTION RISK RATING: 66 / 100 ELEVATED

TRANSACTION CONTEXT & STATUTORY SUMMARY

The proposed $5.8B take-private of Option Care Health, Inc. by Onyx Bidco LLC combines a $3.15B debt package with $2.873B in equity commitments, including a $1.4B minority co-investment by wholesale pharmaceutical distributor McKesson Corporation (~48.725% of equity) alongside Clayton, Dubilier & Rice Fund XII. The transaction contains no contractual financing condition and designates the Target an express third-party beneficiary entitled to seek specific performance of the equity commitments. However, the transaction architecture exhibits critical exposure at the intersection of syndicate structure and regulatory standards: equity commitments and the $291.93M Parent Termination Fee limited guarantees are several and not joint, leaving Option Care without recourse against the non-defaulting sponsor if either party fails to fund. Furthermore, while Parent is subject to a heightened 'best efforts' obligation for state healthcare and pharmacy licensing across Target's 86 pharmacies and 187 ambulatory infusion suites, antitrust clearance under the HSR Act is governed solely by a mutual 'reasonable best efforts' standard. Because Option Care sourced 68% of its supplies from four wholesale distributors in 2025 and 57% from three in H1

EVIDENTIARY VERIFICATION & INGESTION INTEGRITY ATTESTATION

PROVENANCE: SHA-256 cryptographic digest of ingested SEC EDGAR filings as of audit date (19 October 2026).

SCOPE: Proves ingestion-phase textual immutability and tamper-evident analytical provenance (internal algorithmic verification; does not constitute external independent CPA/auditor third-party assurance or formal legal counsel opinion).

AUDITED CORPUS: Forms 8-K, Ex-2.1, PREM14A, 10-K | CONFIDENCE: MEDIUM
