01. CATALYST TRIGGER & CREDITOR AMPLIFICATION VECTORS

PRIMARY CATALYST TRIGGER

Issuance of an FTC or DOJ Second Request or vertical competitive inquiry targeting McKesson Corporation's ~48.725% equity interest in Onyx Bidco LLC relative to Target's downstream footprint (86 pharmacies, 187 ambulatory infusion suites across 43 states) and historical procurement concentration (68% across four wholesale distributors).

CREDITOR LEVERAGE & AMPLIFIER

The several-and-not-joint structure of the Equity Commitment Letters and Limited Guarantees, combined with the contractual limitation of antitrust covenants to 'reasonable best efforts', which permits either sponsor to resist structural divestitures, supply-chain unbundling, or behavioral firewalls without triggering breach liabilities before the October 5, 2027 Outside Date.

02. BALANCE SHEET PROPAGATION CASCADE

The proposed $5.8B take-private of Option Care Health, Inc. by Onyx Bidco LLC combines a $3.15B debt package with $2.873B in equity commitments, including a $1.4B minority co-investment by wholesale pharmaceutical distributor McKesson Corporation (~48.725% of equity) alongside Clayton, Dubilier & Rice Fund XII. The transaction contains no contractual financing condition and designates the Target an express third-party beneficiary entitled to seek specific performance of the equity commitments. However, the transaction architecture exhibits critical exposure at the intersection of syndicate structure and regulatory standards: equity commitments and the $291.93M Parent Termination Fee limited guarantees are several and not joint, leaving Option Care without recourse against the non-defaulting sponsor if either party fails to fund. Furthermore, while Parent is subject to a heightened 'best efforts' obligation for state healthcare and pharmacy licensing across Target's 86 pharmacies and 187 ambulatory infusion suites, antitrust clearance under the HSR Act is governed solely by a mutual 'reasonable best efforts' standard. Because Option Care sourced 68% of its supplies from four wholesale distributors in 2025 and 57% from three in H1 2026, combining McKesson's distribution scale with Target's downstream network creates vertical foreclosure scrutiny that the Buyer Consortium is not contractually bound to resolve through burdensome divestitures under a reasonable best efforts threshold prior to the October 5, 2027 outside date.

03. GOVERNANCE TOPOLOGY & FIDUCIARY DISCLOSURE MANDATES

Onyx Bidco LLC's internal governance remains unverified in public filings. McKesson's $1.4B contribution represents ~48.725% of committed sponsor equity, approaching joint-control thresholds. If unfiled side letters or operating agreements grant McKesson negative control rights or board appointment quotas, this concentration creates Section 13(d) group exposure and healthcare licensing control attributions that diverge from Target's disclosure of management continuity as a stand-alone operating company.
